

Biography:

Dr Peter Weimersheimer

Dr. Peter Weimersheimer is Vice President of Clinical Implementation and Education at Butterfly Network. He is committed to transforming health care, especially in resource limited settings, through Butterfly's handheld digital ultrasound technology and Compass AI software. He focuses on developing sustainable and successful Point of Care Ultrasound (POCUS) programs, curriculum design, and hand-on training. Dr. Weimersheimer is Professor Emeritus of Emergency Medicine (EM) at the Larner College of Medicine (LCOM) at the University of Vermont with 30 years of clinical and POCUS experience. He was the founder and Director of the University of Vermont (UVM) Emergency Ultrasound Program, UVM EM Residency POCUS curriculum, UVM TEE (TOE) resuscitation program, LCOM 4th year medical student elective in point of care ultrasound, LCOM integrated 4-year medical school curriculum, and UVM EM nurse/tech POCUS-guided IV program. As UVM Health Network POCUS Director, Dr. Weimersheimer integrated POCUS across 7 Medical Centers and associated outpatient clinics. He developed global POCUS governance policy with network wide privileging and practice across clinical specialties. He is a Professor in the Rural Ultrasound Fellowship. He works internationally with health practitioners and health care leaders on POCUS training and POCUS systems development
