WHERE

Brisbane Convention & Exhibition
Centre

What's On..

8.30AM FIRST LAYER THINKING A quick morning session to build the basics: Grab a coffee and come in for an introductory session to go over 3D printer basics, materials on offer and what sort of free resources you can use to get started with 3D print design today!

8.45AM 3D PRINTING LANDSCAPE 3D Printing Landscape. Listen to expert speakers including Prof Tomas Kron and Dr David Forrestal share about the economy and risk of 3D Printing Applications, as well as the latest from Herston Bio fabrication Institution

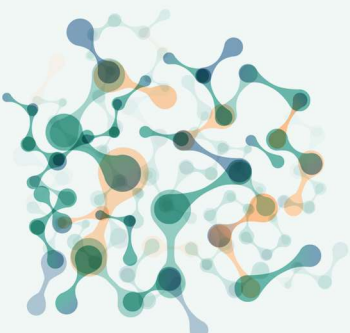

10.30AM PRINT YOUR FUTURE This session is all about getting practical! Hear about how different departments have approached 3D Printing implementation, and stick around to finish the session with a talk directly from the Therapeutic Goods Administration with Dr Chrishanthi Rodrigues!

1:30PM THE INFINITE BUILD PLATE Hear about how design and creativity has shaped innovations throughout departments, and stick around for a show and tell panel session where you can see creations that others have made and ask them questions about the design and print processes, in real time!

3.30PM FROM BLUEPRINT TO BUILD Finish the day with a 3D printing CAD workshop! Our experts will walk you through CAD design (this is perfect for beginners!) and you will have the opportunity to learn 3D design skills that you can take back to your department! There will also be an optical scanning workflow on offer during the session.
