This unique international meeting has an emphasis on short presentations covering all aspects of interventional cardiology and encourages open discussion between faculty and participants, unlike any other meeting in the world.

Hartzler ICS 2016 attendees said:
“Fantastic course. Best aspects: brief presentations, very patient centric/case examples, great interaction with colleagues.”
“Excellent program. Excellent speakers.”

Symposium Directors: J. Aaron Grantham, MD; Rajiv Gulati, MD, PhD; Steven P. Marso, MD; Barry D. Rutherford, MD
The program will be a combination of short case presentations, interventional dilemmas of the day, and formal presentations with discussions at the end of each session (15-20 min). This is a highly interactive program, with unparalleled access to leading interventional cardiologists.

Presentations will cover the following topics:

- Geoffrey O. Hartzler MD Memorial Lecture
  "The Interventional Paradox: When More is More and Less is More"
  Martin B. Leon, MD

- Structural Heart Disease: Aortic and mitral valve disease, new approaches to the tricuspid and pulmonary valves and LAA occlusion.

- Stent Platforms and DAPT: New stent platforms, including bioresorbable polymers and bioresorbable stents, and duration of DAPT therapy

- Advanced Coronary Imaging Techniques: IVUS, FFR, iFR and OCT

- Left Main Disease, Bifurcation Disease and Surgical Turndowns

- Chronic Total Occlusion Percutaneous Coronary Intervention (CTO PCI)

- Complex and High Risk Coronary Intervention: CHIPS, CTO, SVG, Diffuse & Calcific Disease, and Hemodynamic Support

- Management of STEMI Patients: Radial vs. Femoral, MVD and CTO in STEMI pts, and management of thrombus

- Vascular Disease in Diabetics: New medical therapy and interventional approaches

- Complications Session: Solutions for complications and complex cases.

- Lunch Industry Symposia (45 min each)
