	Session 2 - Thursd		
Presenting autho	r	Title	Poster number
Hanna Helene	Allerkamp	The ion channels PIEZO1 and TRPV4 impact the endothelial barrier of placentas from normal and preeclamptic pregnancies in vitro	P2.30
Dimitrios	Amanitis	An ex-vivo macroscopic analysis of the human placental inter-lobular and inter-cotyledon septum and vessels therein from normal pregnancies	P2.20
uan in	Arroyo Bai	Gestational dependent responses to second hand smoke (SHS) and e-cigarette vapor in mouse pregnancies Deep-sequencing Nitroso-proteomes by a Modified SNOSID Proteomics Platform Revealed Novel Roles of Protein Nitrosylation in	P2.64 P2.10
	bai	Uterine Artery Hemodynamics Regulation	12.10
Nirav	Barapatre	From a Single Villous Tree to Whole Placentome – Quantitative Imaging of the Placental Villous Architecture by Micro-CT	P2.12
isa M.	Bebell	Histologic placental findings among people with HIV and people taking PrEP in pregnancy	P2.73
Rebecca Marie-Eve	Brady Brien	Thyroglobulin antibodies impair fertility and litter parameters and impact fetal survival in a rodent model of Autoimmune Thyroiditis Immune change prior to birth in women who developed postpartum preeclampsia	P2.49 P2.68
Michelle	Broekhuizen	Fetoplacental Vascular Reactivity is altered in Fetuses with Congenital Diaphragmatic Hernia	P2.15
Michelle	Broekhuizen	Immune profile alterations in SARS-CoV-2-infected placentas leading to fetal demise and placentas after COVID-19 vaccination during pregnancy	P2.76
Beatrice Anna	Brugger	THE ROLE OF GLUTAMITC OXALOACETIC TRANSAMINASE IN PLACENTAS OF PREGNANCIES COMPLICATED WITH IUGR	P2.94
igne Haaland Venting	Buer Cao	Distinct immunological development throughout pregnancies complicated with preeclampsia, gestational hypertension, and chronic hypertension A microfluidic-supported model for the study of placental transfer mechanisms	P2.103 P2.105
fusmaris	Cariaco	Opioid and cannabis exposure adversely affect fetal and placental growth trajectories in a mouse model of drug consumption during pregnancy	P2.56
Marika	Charalambous	Placental expression of Delta-like homologue 1 (Dlk1) regulates endothelial cell development and hormone production to modulate fetal	P2.6
		growth and maternal fatty acid metabolism	
Chie-Pein	Chen Chen	Transplacental immunoglobulin D protects infants from food allergy Trophoblast HtrA4 expression is involved in the development of placenta accreta spectrum	P2.84 P2.86
Qian	Chen	Trophrousast Trush expressions is movived in the development of placenta actues a spectrum. Systematic characterisation of urine small extracellular vesicles from normal pregnancy and early-onset preeclampsia.	P2.100
Minji	Choi	Characteristics of natural killer cells in umbilical cord blood with fetal growth restriction	P2.77
Natasha	de Alwis	Upregulation of placental Ski-like proto-oncogene in preterm preeclampsia: potential target for preeclampsia treatment?	P2.46
laxuan Ileanor	Deng Doman	Investigating the Role of Nuchal Fold in Predicting Small-for-Gestational-Age at Birth Characteristics of microscopic and application of the Company of the	P2.66 P2.7
lana	Elkin	Characterization of micro-haemodynamics in the placental intervillous space by integrated experimental and theoretical approaches Exploring toxicant-induced changes in tissue cell type proportions as a mechanism underpinning toxicity in the placenta	P2.7 P2.26
Stacey J	Ellery	The Role of Creatine in Placental Energy Metabolism at Birth: Initial Insights from the Creatine and Pregnancy Outcomes (CPO)	P2.23
	·	Cohort Study of Low-Risk Pregnancy	
Meagan	Esbin	Arrayed CRISPR screening to identify regulators of trophoblast differentiation and fusion in high-throughput	P2.92
Precious Ann	Fortes	Does Amsterdam Criteria Applied to Term Placentas with Favorable Fetal Outcomes Show Significant Maternal Clinico-pathologic correlation? An Updated Analysis	P2.48
Ricardo E.	Fretes	Macrophage Migration Inhibitory Factor and pro-inflammatory cytokines have a main role in the infection of chorionic villi explants	P2.80
		in vitro by Trypanosoma cruzi, the protozoan that cause congenital Chagas disease	
Paulina	Fuentes	Ex-vivo human placental perfusion as a model for evaluating placental transfer of PETN to prevent Intrauterine Growth Restriction	P2.107
Barbara Gaowen	Fuenzalida Gan	Physiological in vitro cellular model mimicking the maternal-fetal interface Angiopoietin-2 promotes phenotype switching of spiral artery vascular smooth muscle cells by regulating autophagy and ferroptosis	P2.58 P2.99
Kiaowen Meekha	George	Angiopoletin-2 promotes pnenotype switching of spiral artery vascular smooth muscle cells by regulating autophagy and terroptosis Interplay between pregnancy associated melanoma cells and placental tissue	P2.99 P2.43
Zhirong	Guo	Plasma proteomics identify biomarkers and pathogenesis of placenta accreta spectrum disorders.	P2.101
Madhavi	Harhangi	The endocannabinoid system and its vascular effect in healthy and preeclamptic placentas	P2.41
Monika	Horvat Mercnik	Activin receptor-like-kinase-2 (ALK2)-Snail pathway drives endothelial to mesenchymal transition (EndoMT) in feto-placental	P2.45
Monika	Horvat Mercnik	endothelial cells (fpEC) of early onset preeclampsia (EO-PE) A paracrine crosstalk between Hofbauer cells (HBCs) and feto-placental endothelial cells (fpECs) contributes to the endothelial to	P2.78
	THO THE INCIDENCE	mesenchymal transition (EndoMT) in early onset preeclampsia (EO PE)	12.70
Khanh	Huynh	Sexual dimorphic TGF-beta signaling in the Blood-Brain barrier of growth restricted fetuses in a Guinea Pig model of FGR	P2.5
Mai	Inagaki	Reuptake system of extracellular vesicles in human trophoblast cell line	P2.60
Foby	Jackson Jankovic-Karasoulos	A pipeline for quantitative analysis of high-resolution micro-CT of the vasculature of the feto-placental cotyledon	P2.13 P2.53
Tanja Anders Hagen	Jarmund	Folic Acid Food Fortification, Maternal Endocrine Status And Gestational Diabetes Mellitus Dyslipidemia and immunological deviation in diagnosed preeclampsia	P2.33
Dr. Helen	Jones	NOTCH1 SNP in Individuals with CHD is Associated with Impaired Invasion in a Model of Extravillous Trophoblast	P2.90
Leena	Kadam	Maternal obesity and Gestational Diabetes Mellitus (GDM) affect placental Nischarin expression in a sexually dimorphic manner.	P2.35
Leena	Kadam	Maternal obesity and GDM affect regulation of placental protein metabolism in a fetal sex-dependent manner.	P2.36
Byung Soo Rona	Kang Karahoda	Prediction of fetal growth restriction in Asian women using machine learning algorithms. GLUCOSE AND METFORMIN MODULATE THE NLRP3 INFLAMMASOME IN HUMAN PLACENTAL EXPLANTS	P2.65 P2.50
Madeline	Keenen	Transcriptional specialization of nuclei in the giant, multinucleated syncytiotrophoblast cell	P2.91
Ulrike	Kemmerling	Porphyromonas gingivalis lysate induces tissue disorganization and proinflammatory response in human placental explants	P2.81
Ulrike	Kemmerling	Host-pathogen interaction: Role of Trypanosoma cruzi-derived exovesicles during ex vivo infection of human placental explants	P2.82
Ulrike Anna	Kemmerling Kluivers	Toxoplasma gondii infection induces RAGE receptor expression in a human placental explant model Placental transfer and metabolism of betamethasone in healthy and preeclamptic human placentas	P2.83 P2.108
lunya	Kojima	Sirtuin 1 (SIRT1) is a potential therapeutic candidate gene for fetal growth retardation	P2.32
Dong Wook	Kwak	Lipidomic profiling of preeclamptic placenta according to severe features	P2.22
Gendie	Lash	Extravillous trophoblast cell derived exosomes induce vascular smooth muscle cell apoptosis via a mechanism associated with miR-143-3p	P2.9
Sien Yee	Lau	Placental extracellular vesicles provide transient protection against cardiovascular disease development in rodents	P2.111
Lopa Meng-die	Leach Li	The effect of gestational diabetes on the ability of human umbilical mesenchymal stem cells to influence endothelial permeability Involvement of ADAMTS4 in membrane rupture at parturition	P2.38 P2.44
Kiaojia	Li	Placentas from women of advanced maternal age (AMA) show increased activation of the unfolded protein response (UPR) but this is not	P2.54
		exacerbated in the presence of Fetal Growth Restriction (FGR).	
Kuelan	Li	Integrated management of women with a history of preeclampsia in a subsequent pregnancy: the field experience in Xi'an China	P2.55
Kuelan Mengdie	Li	The abundant levels of peptides in serum from preeclampsia women could be potential biomarkers for early diagnosis Tim-3+ decidual M\(\phi\) sinduced Th2 and Treg bias in decidual CD4+T cells and promoted pregnancy maintenance via CD132	P2.69 P2.75
i-Jun	Ling	PAI-1 drives amnion epithelial cell senescence at parturition	P2.75 P2.37
.u	Liu	Accumulation of CXCR3- KLRG1+ CD8+ T cells in decidualized endometrium: pathogen-specific defense to protect the embryo?	P2.106
Sina	McNeill	Low oxygen drives expansion of the extravillous trophoblast progenitor pool and blunts extravillous trophoblast maturation	P2.88
Ellen Grace	Menkhorst Mercer	Placental inflammasomes: friend or foe? Placental metabolomics to predict preterm birth	P2.27 P2.25
/ivien	Michaelis	New insights on transfer and toxicity mechanisms of essential and toxic metals across an in vitro model of human villous trophoblasts	P2.25 P2.96
Sakurako	Mishima	Elucidation of blood pressure elevation mechanism mediated by placental (pro)renin receptors in preeclampsia model mice	P2.51
Annemarie	Mulders	Associations between first-trimester utero-placental vascular development and maternal serum biomarkers of placental	P2.102
Padma	Murthi	development: the Rotterdam Periconception cohort Defective inflammasome signalling in trophoblasts: implications for aberrant trophoblast innate and immune responses in preeclampsia.	P2.47
Padma Sol	Murthi Olivera	Investigation of the placental gene expression of fatty acid regulators as evidence of ectopic fat storage and essential fatty acid transport	P2.47 P2.52
Paschalia	Pantazi	Sexual dimorphism in placental responses to macrophage extracellular vesicles	P2.79
Kyo Hoon	Park	Plasma acute phase proteins in women with preterm premature rupture of membranes: relationship to acute histologic chorioamnionitis,	P2.72
Vaal	Powance Ive-	intra-amniotic inflammation, and microbial invasion of amniotic cavity	D2 70
Yael Sophie	Pewzner-Jung Piesse	Towards an In-Vivo MRI-Pathology Tool to Decode Placental Abnormalities Early-onset preeclamptic extracellular vesicles elevate maternal arterial blood pressure and cardiac output during pregnancy and	P2.70 P2.109
		postpartum in spontaneously hypertensive rats.	
Hannah	Poisson	Placenta NAD+ depletion: A mechanism through which maternal obesity may drive placenta and fetal programming	P2.31
Mariell	Ryssdal	Metformin treatment in pregnancy reduces the incidence of maternal infections in women with PCOS	P2.74
	Salafia	Does reduced placental villous packing density, a marker of decreased numbers of terminal villi, demonstrate effects on cyto- and chemo-kine levels in newborn dried blood spots?	P2.16
	Salana		
Carolyn	Salafia	Chronic choriodeciduitis demonstrates multiple and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots	P2.17
Carolyn	Salafia		P2.17
Carolyn		Chronic choriodeciduitis demonstrates multiple and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots while chronic villitis does not. Fetal-placental thrombi in muscularized placental vessels have sex-specific effects on cyto- and chemo-kine levels in newborn	P2.17 P2.18
Carolyn Carolyn Carolyn	Salafia Salafia	Chronic choriodeciduitis demonstrates multiple and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots while chronic villitis does not. Fetal-placental thrombi in muscularized placental vessels have sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots.	P2.18
Carolyn Carolyn Carolyn	Salafia	Chronic choriodeciduitis demonstrates multiple and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots while chronic vililitis does not. Fetal-placental thrombi in muscularized placental vessels have sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots. Fetal vascular malperfusion at the capillary level have significant and sex-specific effects on cyto- andchemo-kine levels in	
Carolyn Carolyn Carolyn Carolyn	Salafia Salafia Salafia	Chronic choriodeciduitis demonstrates multiple and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots while chronic villitis does not. Fetal-placental thrombi in muscularized placental vessels have sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots. Fetal vascular malperfusion at the capillary level have significant and sex-specific effects on cyto- andchemo-kine levels in newborn dried blood spots.	P2.18 P2.19
Carolyn Carolyn Carolyn Carolyn Carolin	Salafia Salafia	Chronic choriodeciduitis demonstrates multiple and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots while chronic vililitis does not. Fetal-placental thrombi in muscularized placental vessels have sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots. Fetal vascular malperfusion at the capillary level have significant and sex-specific effects on cyto- andchemo-kine levels in	P2.18
Carolyn Carolyn Carolyn Carolyn Carolin Carolin Callia	Salafia Salafia Salafia Schliefsteiner Schofield Seymore	Chronic choriodeciduitis demonstrates multiple and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots while chronic vililitis does not. Fetal-placental thrombi in muscularized placental vessels have sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots. Fetal vascular malperfusion at the capillary level have significant and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots. Fetal-derived HDL regulates placental vascular tone preferentially via endothelial hyperpolarization and not exclusively by eNOS Elevated soluble prorenin receptor impairs endothelial function in-vitro, promoting a preeclamptic phenotype. Chronic Inhalation of Titanium Dioxide Nanoparticles Disrupts Placental Glucose Transport and Metabolism in a Sex-Dependent Manner	P2.18 P2.19 P2.14 P2.34 P2.63
Carolyn Carolyn Carolyn Carolyn Carolin Lachlan Talia Saira	Salafia Salafia Salafia Schliefsteiner Schofield Seymore Shahnawaz	Chronic choriodeciduitis demonstrates multiple and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots while chronic vililitis does not. Fetal-placental thrombi in muscularized placental vessels have sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots. Fetal vascular malperfusion at the capillary level have significant and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots. Fetal-derived HDL regulates placental vascular tone preferentially via endothelial hyperpolarization and not exclusively by eNOS Elevated soluble prorenin receptor impairs endothelial function in-vitro, promoting a preeclamptic phenotype. Chronic Inhalation of Titanium Dioxide Nanoparticles Disrupts Placental Glucose Transport and Metabolism in a Sex-Dependent Manner Aberrant oxidative stress is implicated in early miscarriage in humans with affecting important placental nutrient transporters	P2.18 P2.19 P2.14 P2.34 P2.63 P2.4
Carolyn Carolyn Carolyn Carolyn Carolin Lachlan Falia Salira Erica	Salafia Salafia Salafia Schliefsteiner Schofield Seymore Shahnawaz Smith	Chronic choriodeciduitis demonstrates multiple and sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots while chronic villitis does not. Fetal-placental thrombi in muscularized placental vessels have sex-specific effects on cyto- and chemo-kine levels in newborn dried blood spots. Fetal vascular malperfusion at the capillary level have significant and sex-specific effects on cyto- andchemo-kine levels in newborn dried blood spots. Adam	Stevens	Evidence for recent hominid evolutionary pressure on the mural trophectoderm	P2.97
Minglian	Su	Lividence in Jeden Hominia evolutioniary pressure on the miniari dispirational formation and the properties of the prope	P2.110
Cherry	Sun	Third-trimester side-population trophoblasts can be differentiated to mature trophoblast lineages and show reduced growth in FGR.	P2.95
Masanori	Tachikawa	Proteomics-based comparison of transporter expression profiles in BeWo and JEG-3 cells	P2.59
Bothidah	Thach	HtrA4 is required for differentiation of human trophoblast stem cells into syncytiotrophoblast	P2.85
Kenean Getaneh	Tlaye	Expression of placental aspirin-metabolizing enzymes in women treated with prophylactic low-dose aspirin and their association	P2.33
		with placental functions and senescence-related markers	
Masatoshi	Tomi	Attenuation of murine placental MDR1 and BCRP functions by their unique protein localization	P2.61
Zoe	Tryfonos	First Trimester Hofbauer Cells from Pregnancies with a Higher Risk of Developing Preeclampsia Display Differences in Cell Surface Marker	P2.57
		Expression, Cytokine Secretion and Regulation of Placental Vascular Development Compared to Pregnancies with a Normal Risk	
Maria Lillina	Vignola	Mapping regulatory elements at the DLK1 locus involved in the pathogenesis of human fetal growth restriction	P2.42
Tianran	Wan	A functional exchange 'shunt' in the umbilical cord: the role of coiling structure in solute and heat transfer	P2.8
Lu-Yao	Wang	Downregulation of WTAP-mediated m6A methylation in PRLR facilitates collagen degradation by prolactin in human amnion at parturition	P2.39
Songcun	Wang	Tim-3 Coordinates Macrophage-Trophoblast Crosstalk via Angiogenic Growth Factors to Promote Pregnancy Maintenance	P2.1
Guy	Whitley	Trophoblast derived factors stimulates the release of MMP10 and HB-EGF by endothelial cells	P2.89
Hannah Ee Juen	Yong	Effects of omega-3 fatty acid supplementation on placental lipid metabolismin vitro	P2.21
Melanie	Young	Hypertension and preeclampsia alter placental thyroid hormone metabolism	P2.62
Xin	Yu	The mechanisms of regulation between glucose metabolism and syncytialization in human placental trophoblast cells	P2.98
Jonas	Zaugg	Obesity in pregnancy disturbs the expression of iron homeostasis genes in the placenta and fetus in association with reduced	P2.104
		placental iron accumulation and fetal growth restriction	
Fan	Zhang	Paradoxical induction of ALOX15/15B by glucocorticoids in human amnion fibroblasts and its implications in parturition	P2.28
Lizi	Zhang	Development of a prediction model for recurrent preeclampsia: a multicenter retrospective cohort study	P2.67
Min	Zhao	Placental extracellular vesicles could have a therapeutic potential on ovarian cancer by unique miRNAs presented in placental extracellular vesicles	P2.93
