

Poster Session 1 - Wednesday 6th September

Rutherford Room posters 1-60

Presenting author	Title	Poster number
Alison D. Gernand	Protocol for Development of Software to Rapidly Assess Placenta Images at Birth	P1.1
Adrienne Scott	Image-based modeling workflow to relate changes of villous structure to changes in function	P1.2
Vijayalakshmi Srinivasan	Comparing the effects of feto-placental vascular branching on haemodynamics in rodent placentas and human cotyledons	P1.3
Amrita Arcot	Gestational Diabetes Mellitus and Placental Weight: A Systematic Review and Meta-Analysis	P1.4
Alicia Jawerbaum	Impaired microRNA-21 and prolactin receptor levels in the decidua of the prepubertal offspring of diabetic rats are prevented by maternal diets enriched in olive oil	P1.5
Liyuan Cui	Circadian gene Rev-erba influenced by sleep conduces to pregnancy by promoting endometrial decidualization via IL-6-PR-C/EBPβ axis	P1.6
arpita mukhopadhyay	Human placental expression of peroxisome proliferator-activated receptors gamma (PPAR-γ): fetal sex-specific relations with fetoplacental growth	P1.8
Nitalia Naidoo	Single nucleotide polymorphisms of neuropilin-1 in preeclampsia comorbid with HIV infection in women of African ancestry	P1.9
Alice Chibnall	Regulating murine placental hormone production via the antagonistic function of imprinted genes Peg3 and Phlda2	P1.10
Sasha Post	Human Adaptation to High Altitude via Tripartite Methylation at an Intronic CACNA1C CpG-SNP in the Placenta	P1.11
Jae Eun Shin	Maternal Gestational Diabetes Influences DNA Methylation in the Serotonin System in the Human Placenta	P1.12
Cherlyn Tan	Non-CpG Methylation in the Placenta	P1.13
Junshen He	Placental Diffusion Derived Vessel Density in Fetal Growth Restriction: A Functional Magnetic Resonance Imaging Study	P1.14
Anandita Umapathy	The heart-placenta axis is dysregulated in a conditional Hand1 mutant model of FGR	P1.15
George Hutchinson	Effects of maternal blood supply on IVIM parameters in Diffusion Weighted Magnetic Resonance Imaging	P1.16
Katsuhiko Naruse	Background, ultrasound screening and pathology of placenta membranacea: case series	P1.17
Lindsay Cahill	The impact of maternal exposure to micro-/nanoplastics on placental development, function and metabolism	P1.18
Ruth Opoku	The effect of genetically reduced maternal myostatin on maternal, fetal and placental metabolites in late gestation mice.	P1.19
Tina Buerki-Thurnherr	Nanoparticle interference with maternal-fetal communication at the placenta and subsequent impact on angiogenesis and neurodevelopment	P1.20
Cindy Xin Wen Zhang	Effect of Increased Maternal Spleen-Liver Axis Inflammation during Obese Pregnancy on Placental Nutrient Transport	P1.21
Amelia Tanner	Acute fetal hyperglucagonemia decreases fetal amino acid concentrations but fails to inhibit uterine blood flow, placental nutrient and oxygen transport, or placental glucose and oxygen utilization.	P1.22
Yunhui Tang	Comprehensively analysis of the role of proteins carried by placental extracellular vesicles in maternal vascular adaptation	P1.23
Risha Amarsi	Single-cell RNA sequencing of the maternal hypothalamus reveals a distinct neuroendocrine transcriptome in pregnancy.	P1.24
Icía Fernández Boyano	Know Your Placenta: A Public Awareness Campaign with an Integrated Knowledge Translation (iKT) approach	P1.25
Bridget Tsai	Changes in abundance of proteins associated with EV biogenesis, and nuclear health in extracellular vesicles from human placentae exposed to antiphospholipid antibodies.	P1.26
Ayako Hashimoto	Elucidating the mechanisms of maternal organ damage mediated by placenta-derived exosomes in preeclampsia.	P1.27
Abby Bergman	Investigating the role of an endogenous retroelement at the maternal-fetal interface	P1.28
Sreeparna Bhaumik	Maternal Stress, Anxiety, And Depression Are All Associated With Increased Placental Glucocorticoid Receptor D1 Isoform Expression	P1.29

Pascale Chavatte-Palmer	Late gestation heat stress impairs placental microstructure in dairy cows	P1.30
yu liu	Trophoblast DAB2 facilitated decidual VSMCs apoptotic through reprograms VSMCs phenotype switch	P1.31
Doreen # Padan Ben Yashar	Transglutaminase 2 (TG2) expression in placenta of murine gestational hypoxia	P1.32
Kathryn Storey	Effect of Murine Placental Secretions on Islet Beta Cell Adaptations in Normal and GDM Pregnancies	P1.33
Elsa Bernier	Circulating and placental inflammatory profile in early vs late preeclampsia	P1.34
Jon Schoorlemmer	Comparison of placental gene expression in COVID-19 and PE patients: markers representative of inflammation and endothelial damage	P1.35
Mbuso Mthembu	Plasma concentrations of Asymmetric Dimethylarginine in Endothelial injury in HIV associated Preeclampsia.	P1.36
Mikyle David	THE FUNCTION OF C3 AND ADIPSIN IN THE SYNERGY OF HIV INFECTION AND PREECLAMPSIA	P1.37
Priyadarshini Pantham	Transcriptomic Profiling of Urinary Extracellular miRNAs in Preeclampsia	P1.38
Serisha Sewnarain	Placental progesterone and its receptor in HIV-infected pre-eclamptic women	P1.39
Shoohana Singh	Placental AT1R, AT2R and AT4R immunoexpression in Preeclamptic HIV-infected women: A morphometric image analysis.	P1.40
Shuxian Wang	Composition of Circulating Short-Chain Fatty Acids in Gestational Diabetes Mellitus and Their Associations with Placental Immune-Metabolic Responses	P1.41
Sien Yee Lau	Placental Extracellular Vesicles in Preeclampsia – Where do they go?	P1.42
Tashlen Abel	Histological analysis of Vascular Endothelial Growth Factor Receptor 2 in the placenta of Preeclamptic and HIV infected women of African ancestry	P1.43
Vladimira Foteva	The role of the ubiquitous micronutrient molybdenum in the placental antioxidant response	P1.44
Jiaxin Li	Single-cell multi-omic analysis reveals imprinted gene PEG10 activation and epigenetic reprogramming associated with developmentally delayed trophoblasts cell and impaired spiral artery remodeling in preeclampsia	P1.45
Aditi Godhamgaonkar	Early pregnancy oxidative stress is associated with shorter placental telomeres in preeclampsia	P1.46
Alicia E. Damiano	AQP4 AND AQP9 POSITIVE-EXTRACELLULAR VESICLES IN PREECLAMPSIA	P1.47
Anna L. David	Maternal nutrient restriction in guinea pigs increases resistance in the umbilical artery at mid-gestation.	P1.48
Ashley Meakin	Placental- and sex-specific differences in glucocorticoids and their receptor variants in the growth restricted sheep	P1.49
Baoying Huang	TNF α -GSDME mediated pyroptosis in placental trophoblast contributes to systemic inflammation in EOPE patients.	P1.50
Bianca Fato	The Brain Natriuretic Peptide (BNP) system is expressed in the placenta and vasculature in preeclampsia: potential implications for novel therapeutic strategies	P1.51
Camille Couture	Comparison of the placental inflammatory profiles across pregnancy complications	P1.52
Ciara Murphy	In vitro investigation into the regulation and function of SPINT1, a biomarker for fetal growth restriction	P1.53
Claire Richards	Evaluating gene delivery technologies to investigate the role of FKBPL in trophoblast function and the therapeutic potential of mesenchymal stem cell-derived extracellular vesicles	P1.54
Cornelia Kampfer	The number of trophoblast-derived particles in the intervillous space is higher in female than in male normal human placentas	P1.55
Cornelia Kampfer	Fibroblast activating protein (FAP) is reduced in FGR in regions of the villous tree with disturbed differentiation of perivascular myofibroblasts	P1.56
Dayna Zimmerman	The effects of metformin treatment for diabetes during pregnancy on placental mitochondrial function and fetal outcomes	P1.57
Dinara Afrose	Uric acid is a promising biomarker and target of preeclampsia	P1.58
Julie Moore	Inflammation, coagulation, and oxidative stress in malaria-induced pregnancy compromise	P1.59
Jon Schoorlemmer	Placental gene expression in pregnant women who suffered an episode of COVID-19 disease as a function of the trimester of infection, SARS-CoV-2 variants and preeclampsia	P1.60

Matariki Room Posters 61-110		
Juan Arroyo	Decreased RAGE and AXL receptor in the Placenta of ZIKA infected mothers.	P1.61
Thajasvarie Naicker	Advanced Abdominal Pregnancies co-infected with SARS-CoV-2 and HIV-1 Infections: a pathological preview	P1.63
Carolin Schliefssteiner	Human placental Hofbauer cells have distinct functional features and omit re-polarization in vitro	P1.64
Cilia Abad	The Impact of Systemic Inflammatory Response on Placental Tryptophan Metabolism in Wistar Rats	P1.65
Daniel Álvarez	Endothelial procoagulant activity and release of endothelial cell-derived extracellular vesicles driven by antiphospholipid antibodies	P1.66
Haemin KIM	Umbilical Cord Thrombosis Is More Increased according to The Progression of Outside-In Neutrophils Migration in Extra-Placental Membranes among Early Spontaneous Preterm Birth.	P1.67
Humblenoble Stembridge Ayuk	Entry points for SARS-CoV-2 in trophoblast cells and possible mechanisms of resistance	P1.68
Jessica Weng	Functional analysis of HMGB1 at the maternal-fetal interface	P1.69
Jessica Weng	Cell-specific inflammatory profile at the maternal-fetal interface in spontaneous and iatrogenic preterm and term birth	P1.70
Jimena S. Beltrame	Altered gestational parameters and offspring health in a rat model of subclinical infection.	P1.71
Julie Moore	Necroptosis associates with infection severity and birth outcomes in placental malaria	P1.72
Georgia Wong	Characterising side population genes in placentas from patients with preeclampsia and/or fetal growth restriction.	P1.73
Balaji Rao	Derivation of human trophoblast stem cells from placentas at birth	P1.74
Rebecca L. Wilson	Nanoparticle-mediated delivery of insulin-like growth factor 1 to the placenta in the non-human primate is safe and regulates placental signaling	P1.75
Sally Collins	A NOVEL METHOD FOR THE QUANTIFICATION OF MATERNAL MORBIDITY IN COMPLEX OBSTETRIC SURGERY FOR PLACENTA ACCRETA SPECTRUM	P1.76
Sam Blessen Fredrick	Targeting Placental DEPTOR restores mitochondrial function in a mouse model of Intra Uterine Growth Restriction (IUGR)	P1.77
Shuwen Lei	Development of novel AOX1 inhibitors to prevent or reverse placental oxidative damage	P1.78
Baylea Davenport	IGF-1 Gene Therapy Attenuates Fetal Growth Restriction and Placental Insufficiency Through Sexually Dimorphic Mechanisms in a Guinea Pig Model	P1.79
Hannah Ee Juen Yong	The in vitro effect of myo-inositol and scyllo-inositol on placental lipid metabolism	P1.80
Yasuhiro Tanaka	Macrolide antibiotics enhance the oxidative stress tolerance of trophoblasts.	P1.81
Vijay Pratap Singh	c-Myc promotes polyploidy in murine trophoblast cells and suppresses senescence.	P1.82
Nicholas P. Illsley	Development of a scoring metric for the epithelial-mesenchymal transition (EMT) in trophoblast differentiation	P1.83
Shilei Bi	Kat8-mediated H4K16ac is essential in maintaining trophoblast stemness by regulating CDX2 expression	P1.84
Stephen Renaud	Decidual stromal cells promote invasiveness of extravillous trophoblast cells: a potential role for osteopontin	P1.85
Subhradip Karmakar	ROLE OF CORTISOL ON HUMAN TROPHOBLAST INVASION AND DIFFERENTIATION	P1.86
Sumaiyah Shaha	Atypical protein kinase C isoforms promote human syncytiotrophoblast fusion	P1.87
Sunil Singh	UPM-mediated epigenetic modifications disrupt invasion and differentiation in placental trophoblast cells: Investigating the impact of environmental air pollution on placental and fetal health.	P1.88
Zi Lv	From 2D to 3D imagings: the fetal vascular malformation characterizes fetomaternal hemorrhage placentas	P1.89
Wang-sheng Wang	DNMT1-mediated DNA methylation contributes to CYP11A1 expression in progesterone synthesis in placental trophoblast syncytialization	P1.90
FAN PAN	Azithromycin disturbs steroid hormone biosynthesis via ER stress in human placental trophoblasts	P1.91
Shuang Zhang	Generating Functional Multicellular Organoids from Human Placenta Villi	P1.92

Jee Yoon Park	Placenta and Neonatal Lung Model on Microfluidic Analysis Platform (MAP) to Explore the Effects of Antenatal Corticosteroids	P1.93
Samantha Zambuto	Trophoblast-mediated spatial changes in hydrogel matrix properties	P1.94
Christopher Moraes	Mechanical stress patterns arising spontaneously during placental trophoblast fusion can be tuned to enhance and direct fusion events	P1.95
Christiane Pfarrer	Volume analysis and three-dimensional imaging of the migration process of bovine trophoblast giant cells at mid and end of gestation	P1.96
Davis Laundon	Comparative placentation from a three-dimensional and multiscale structural perspective	P1.97
Haruka Matsui	Investigation of the involvement of placental epigenetic regulation via histone methyltransferases in preeclampsia	P1.98
Scott Lindsay	Whole transcriptome spatial profiling reveals the location of distinct cell subtypes and novel biomarkers in the human term placenta	P1.99
Hans-Georg Frank	Villous Trees in PE and FGR are altered in diverging, sexually dimorphic and syndrome specific patterns	P1.100
Melanie Smith	Sex-specific analysis of placental gene expression in late-onset preeclampsia	P1.101
Natalie K Binder	Therapeutic intervention to alleviate long-term cardiovascular risk following preeclampsia	P1.102
Leena Kadam	Sexually dimorphic alterations in placental senescence pathways in Gestational Diabetes Mellitus (GDM)	P1.103
Priyadarshini Pantham	Modeling Placental-Renal Interactions in Preeclampsia using a 3D Microphysiological Cell Culture System	P1.104
Juan Cheng	Oxidative stress microenvironment responsive multifunctional nanoparticles for targeted prevention and treatment preterm birth caused by placental inflammation	P1.105
Neva Kandzija	Using isolated mitochondria to improve placental bioenergetics: A potential treatment for Fetal Growth Restriction (FGR)	P1.106
Craig Bierle	CD4+ but Not CD8+ T Cells Are Required for Protection Against Severe Guinea Pig Cytomegalovirus Infection	P1.107
Sampada Kallol	Stem cell and differentiation potential of term cytotrophoblast	P1.108
