

## ADVANCED TRAINEE ABSTRACT SUBMISSION

The deadline for Advanced Trainee submission can be found on the [Sleep DownUnder website](#). **Abstracts are limited to a maximum of 250 words.**

It is acknowledged that due to the timelines of the Advanced Trainee program, the research study may not be completed, and results may not be available at the time of abstract submission. As long as results will be available by the time of presentation, Advanced Trainees may submit an abstract of their work with results pending.

To ensure your abstract is reviewed appropriately, please ensure you are submitting in the **Advanced Trainee Abstract Portal**.

Advanced Trainee abstracts **MUST** contain the following headings:

- Background
- Methods
- Progress to date
- Intended outcome and impact

Advanced Trainee abstracts will be reviewed on the following criteria:

- Scientific quality
- Feasibility
- Potential contribution to the field

You will be required to confirm that your submission is your own original work, and all submissions may be assessed by anti-plagiarism technology. Only abstracts reporting data that has not been previously published will be accepted. If an abstract is approved for publication post-submission and pre-conference, then we cannot publish the abstract in the meeting proceedings.
